

## **Definition of the Election**

An election is a process in which people vote to choose a candidate or a group of people to hold an official position. With the election, citizens can freely express their dissatisfaction with a current government. By seizing the possibility of sanctioning the candidate or of renewing his mandate during the elections. Elections allow the citizens of the country to exercise their citizenship, protect their freedom and make democracy work.

## **Define the problem**

After a few years, we have noticed that in Haiti, the electoral process is going through several difficulties. Every time there is an election, Haitians (Specially young Haitians) are not interested in voting because of the lack of confidence in our candidates.

This problem is important because if we need a good change in this country, Everyone must participate in the election so that we can have a good leader.

## **Define the context of the problem**

This problem exists in the context where every time a president is elected after an election, he never keeps his promises and much of this leads Haitians to withdraw their trust in our politicians.

There are alternative solutions that can help us solve this problem, if we take the right security measures in the country, and every time there is an election we need to educate everyone about the importance of the election, how a single vote can bring change to the community we live in.

## **Project conceptual model**

The solution to this problem will be helpful to all Haitians, because if we refuse to vote for real change, we will let those who vote decide which political parties will receive the most public funds, and if we don't vote, we will let someone or some political party that would not even be in the interest of the country become our president

This problem affects all Haitians, when there are elections and we do not want to go vote, we open the door to corruption and insecurity in the country. We will never see a good change until everyone votes for a real leader

And despite all of these problems, Haitians remain silent every time there is an election because they no longer trust the elections process. Because every time they vote, they are never satisfied with their government.

### **Strengths**

There are several assets that we can exploit to find solutions to this problem like:

- In our country, most Haitians have an identity card.
- Most Haitians dream of real change for their country. They just haven't found real leaders to vote for

### **Weaknesses**

The Insecurity in this country is one of the weak points for the realization of this project

### **Opportunities**

The fact that most Haitians have an ID card will be an excellent opportunity for them to vote

### **Threats**

Because of the insecurity, this will become a threat to most Haitians because every time there is an election, there is always chaos at the polling stations.

## Realization of this project

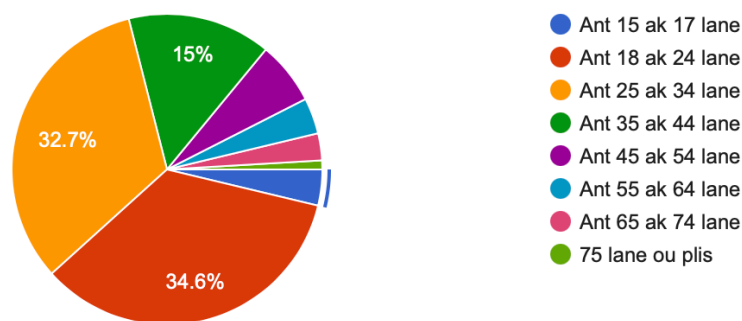

Over the past decade, bad political practices have weakened all social structures in the country. Our politicians fight for power, politicians who do not keep their promises, when there are elections, there is always chaos in the polling stations. This takes away the confidence of most Haitians in the country because every time there is an election, the percentage of voters is always lower than the percentage of non-voters.

We have a full dataset that we provided using a google form, it can be found [here](#)

*According to the data available to us, 35.5% are women and 61.7% are men, most of them are in the younger age groups ranging from 18 to 24 years old (34.6%) and 25 to 34 years old (32.7%), the majority of them have a*

*To bring Solution to this problem we need to*

- 1) Conduct an awareness campaign and educate the population politically,*
- 2) To manage the security problems in the country, when there will be elections in the country, we will have to secure the polling stations*
- 3) For all those who want to become candidates, we have to check their background to see if they can be a real leader, because for this moment we live in the country, we need a real leader.*
